

VULNERABILITY ASSESSMENT OR WEB APPLICATION SCAN

Whether you want your Network or Web Application assessed, TechGuard includes Vulnerability Assessments as part of our complimentary services for AIG CyberEdge Insurance Policyholders.

Identify Quantify Classify

Our Vulnerability Assessment uses scan engines that contain the latest known vulnerabilities. The Cybersecurity Specialists at TechGuard have a deep technical understanding of these vulnerabilities and how they can be remediated or mitigated.

REPORT

An in-depth understandable look into your current security posture and recommendations for improvement.

CONSULTATION

An opportunity to discuss remediation priorities and ensure all of your questions are answered.

REASSESSMENT

Ensures remediation efforts close all gaps, providing you with peace of mind.
