

Release Notes - May 18, 2020

Fixes

- Misc. Bug Fixes

Improvements

- EPA ID on the disposal facility is no longer a required field Updated Environment with new WLQ Fillable PDF (be sure to open in adobe and not web version)
- Certification Approval and Required Fields in set up tools now allows you to remove most of the defaults previously set by WASTELINQ
- Allow negative actual pricing on Waste Product Codes and Profiles for instances where companies are getting credit for items like Used Oil, etc.
